Glove type	Impact glove
Sizes available	9 (L), 10 (XL)
Packaging	Sold as pairs
Quantity per pack	1
Quantity per box	50

5th generation impact glove with extra protection, raised padding, improved toughened fabrics and rubber coating on the palm for superior grip.

Use

General heavy handling. This glove has a Velcro fastening. Made from a synthetic outer and PU at the palm with black fabric lining. Only use this product within the limits of its use. Glove can be personalised (subject to minimum order quantity).

Limits of use

Do not use: for protection against chemicals, for handling hot parts in extreme conditions. Gloves must not be worn when there is a risk of entanglement by moving parts of machines. There is no standardised test method at present for detecting U.V penetration of materials for gloves but the current methods of construction of protective gloves for welders do not normally allow penetration of U.V radiation. Arc welding: These gloves do not provide protection against electric shock caused by defective equipment or live working. The electric resistance is reduced if gloves are wet, dirty or soaked with sweat, this could increase risk.

Puncture Resistance (1 - 4)	3
Tear Resistance (1 - 4)	3
Blade Cut Resistance (1 - 4)	2
Abrasion Resistance (1 - 4)	3
0: indicates the globe falls below minimum level for given hazard	
x indicates the glove has not been submitted to the test or it is not suitable	
Levels of glove: 1 = lowest, 4 = highest. 5 = highest for blade cut resistance	

EN388:2003

Storage

Package away from dust and light in a cool dry place. Plastic bags may be dangerous for babies/children: KEEP AWAY FROM CHILDREN.

Obsolescence

The life of this product cannot be specified or guaranteed but depend on use. The suitability of this product is always to be determined by the user.
