

FR zero hood

Code: TZH-FR

EN ISO 11612:2008 A1, B1, C1

Sizes available	One size
Quantity per pack	1
Quantity per box	100

Zero hoods help maximise worker efficiency and safety in cold and wet weather conditions by protecting against heat loss through the heat, ensuring alertness in safety critical environments.

Description

Navy anti-flame treated cotton outer fabric. Unit consists of zip-off zero hood cap and knitted cape with Velcro fastening at front. 100% cotton fabric treated with durable water repellent finish.

Use

This quilted thermal zero hood is designed to add an additional layer of warmth under your hard hat in the cold winter months. The cotton outer fabric and brushed cotton lining will give extra warmth and comfort whilst the knitted acrylic collar will provide extra protection for your neck. Additional protection is afforded by the use of flame retardant fabrics.

Use of this winter liner will void the ANZI Z89.1 Class B (high voltage) rating of a hard hat.

EN ISO 11612

After care

Maximum wash is 50 cycles, wash as cotton. Do not wash in biological powder. Machine wash, minimum tumble dry, short spin, wash separately, drip dry. Do not dry clean. Repeated washing may decrease the flame retardant properties.

Obsolescence

The life of this product cannot be specified or guaranteed but depend on use. The suitability of the use of this product is always to be determined by the user.
